CURRENT PROJECT

I am currently developing a data visualization platform that simplifies visualizing data.

Key features include:

- **Automated Table Generation:** Instantly creates tables from uploaded data.
- **Interactive and Customizable Charts:** Users can choose chart types, rename headers, use a brush tool for selecting specific chart ranges, and customize color palettes.
- **Export Options:** Enables users to download charts in PNG, JPG, and PDF formats.

As an AI enthusiast, I am also planning to implement data analysis using AI techniques, further increasing the analytical capabilities of the project.

Technologies Used: React.js, Next.js, Tailwind, CSS, Figma, TanStack.
